

HeartGuide™ Wearable Blood Pressure Monitor (BP8000-M/BP8000-L)

HeartGuide is the **first wearable blood pressure monitor** in the compact form of a wristwatch – for those who want to keep close watch on their heart health anytime, anywhere and take action for their heart health.

- The sleek and stylish HeartGuide uses an inflatable oscillometric blood pressure cuff -- the same technology used in a doctor's office -- to ensure accurate and reliable readings.
- **HeartGuide is registered with the FDA as a medical device.**
- HeartGuide **accurately measures blood pressure, daily activity (including steps, distance and calories burned), pulse rate and sleep quality.** It also functions as a smartwatch, where users can receive texts, calls and email notifications.
- OMRON filed **more than 80 new patents** to create HeartGuide in the compact form of a wristwatch and provide medical-grade accuracy via wrist measurement. Some of the pumps and valves in HeartGuide are as small as a grain of rice.
- HeartGuide holds up to 100 measurements in memory and **syncs with the OMRON Connect mobile app**, which stores and tracks heart health data and provides insights and personalized coaching to help users take action for their heart health.
- A typical user can expect to charge HeartGuide™ approximately 2-3 times per week, depending upon the frequency of use of HeartGuide's feature.
- HeartGuide™ is available in sizes medium and large.

Specifications	Diameter approximately 1.89" (48 mm) Case thickness approximately 0.55" (14 mm) Band width approximately 1.18" (30 mm)
Availability & MSRP	OmronHealthcare.com; \$499 (USD)
